A CRI score of 95 is considered very high, and indicates that a light source will make objects appear very similar to how they would look under natural lighting conditions.

Without a high CRI light source, objects can appear faded, dull or inaccurate.

V-TAC Smart Light products work with Amazon Echo, Echo Dot, Amazon Tap and Google Home. You can use Alexa to voice control your home appliances with simple commands.

To use this function, you just need to link your V-TAC Smart Home account with the Amazon Alexa App. With a few steps, you can tell Alexa to turn on or off any light and any appliances.
